

Customer Shopping Behavior Analysis

1. Project Overview

This project analyzes customer shopping behavior using transactional data from 3,900 purchases across various product categories. The goal is to uncover insights into spending patterns, customer segments, product preferences, and subscription behavior to guide strategic business decisions.

2. Dataset Summary

- Rows: 3,900
- Columns: 18
- Key Features:
 - Customer demographics (Age, Gender, Location, Subscription Status)
 - Purchase details (Item Purchased, Category, Purchase Amount, Season, Size, Color)
 - Shopping behavior (Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type)
- Missing Data: 37 values in Review Rating column

3. Exploratory Data Analysis using Python

We began with data preparation and cleaning in Python:

- **Data Loading:** Imported the dataset using `pandas`.
- **Initial Exploration:** Used `df.info()` to check structure and `.describe()` for summary statistics.

	Customer ID	Age	Gender	Item Purchased	Category	Purchase Amount (USD)	Location	Size	Color	Season	Review Rating	Subscription Status	Shipping Type	Discount Applied	Promo Code Used	Previous Purchases	Payment Method	Frequency of Purchases

● **Missing Data Handling:** Checked for null values and imputed missing values in the **Review Rating** column using the median rating of each product category.

● **Column Standardization:** Renamed columns to **snake case** for better readability and documentation.

● **Feature Engineering:**

○ Created **age_group** column by binning customer ages.

○ Created **purchase_frequency_days** column from purchase data.

● **Data Consistency Check:** Verified if **discount_applied** and **promo_code_used** were redundant; dropped **promo_code_used**.

● **Database Integration:** Connected Python script to MySQL and loaded the cleaned DataFrame into the database for SQL analysis.

4. Data Analysis using SQL (Business Transactions)

We performed structured analysis in MySQL to answer key business questions:

1. Revenue by Gender – Compared total revenue generated by male vs. female customers.

	gender	revenue
▶	Male	136168
	Female	64103

2. High-Spending Discount Users – Identified customers who used discounts but still spent above the average purchase amount.

	customer_id	purchase_amount
▶	2	64
	3	73
	4	90
	7	85
	9	97
	12	68
	13	72
	20	90
	22	62
	24	88
	29	94
	33	67
	35	91
	37	69
	41	76
	43	100
	44	69
	55	64

3. Top 5 Products by Rating – Found products with the highest average review ratings.

	item_purchased	Average Product Rating
▶	Sandals	3.84
	Boots	3.81
	Belt	3.81
	Hat	3.8
	Gloves	3.79

4. Shipping Type Comparison – Compared average purchase amounts between Standard and Express shipping.

	shipping_type	round(AVG(purchase_amount),2)
▶	Express	60.49
	Standard	58.72

5. Subscribers vs. Non-Subscribers – Compared average spend and total revenue across subscription status.

	subscription_status	total_customers	avg_spend	total_revenue
►	Yes	904	59.56	53838
	No	2443	59.94	146433

6. Discount-Dependent Products – Identified 5 products with the highest percentage of discounted purchases.

	item_purchased	discount_rate
►	Hat	50.40
	Sweater	48.32
	Pants	48.20
	Coat	47.52
	Jeans	46.88

7. Customer Segmentation – Classified customers into New, Returning, and Loyal segments based on purchase history.

	customer_segment	Number of Customers
►	Loyal	2671
	Returning	603
	New	73

8. Top 3 Products per Category – Listed the most purchased products within each category.

	item_rank	category	item_purchased	total_orders
►	1	Accessories	Jewelry	151
	2	Accessories	Sunglasses	143
	3	Accessories	Belt	138
	1	Clothing	Blouse	156
	2	Clothing	Sweater	149
	3	Clothing	Shirt	141
	1	Footwear	Sandals	137
	2	Footwear	Boots	136
	3	Footwear	Shoes	128
	1	Outerwear	Coat	141
	2	Outerwear	Jacket	139

9. Repeat Buyers & Subscriptions – Checked whether customers with >5 purchases are more likely to subscribe.

	subscription_status	repeat_buyers
►	Yes	824
	No	2157

10. Revenue by Age Group – Calculated total revenue contribution of each age group.

	age_group	total_revenue
►	Adult	47248
	Senior	48002
	Middle-aged	50804
	Young Adult	54217

5. Dashboard in Power BI

Finally, we built an interactive dashboard in Power BI to present insights visually.

Customer Behavior Dashboard

6. Business Recommendations

- **Boost Subscriptions** – Promote exclusive benefits for subscribers.
- **Customer Loyalty Programs** – Reward repeat buyers to move them into the “Loyal” segment.
- **Review Discount Policy** – Balance sales boosts with margin control.
- **Product Positioning** – Highlight top-rated and best-selling products in campaigns.
- **Targeted Marketing** – Focus efforts on high-revenue age groups and express-shipping users.
